

Lighthouse

AUTISM CENTER

Hope for every child, every family™

ALWAYS 1 ON 1 ABA THERAPY

Why is 1 on 1 so important?

Your child's ABA therapist will make sure they are getting any extra attention they might need to learn new skills

The therapist can be fully aware of all your child's behaviors, struggles, triumphs and skills

Lighthouse children are always with their ABA therapist - even during group learning

Safety is significantly increased by having therapists individually assigned to each child at all times

INDIVIDUALIZED THERAPY PROGRAMS

What does an individualized therapy program mean?

Based on a deep assessment of your child's needs, skills and behaviors

Programs are designed with input from you, the parent

Goals are created specifically for each child based on the formal assessment and vital parental input

Your child's progress is tracked and quantified daily and the data is reviewed with you on a continual basis

LIGHTHOUSE COMMUNICATES

How does Lighthouse ROCK at parent communication?

We use daily communication binders to let you know about all your child's challenges and triumphs

You as the parent can use that binder to communicate to us what's going on with your child at home

We communicate with your child's other healthcare providers, like pediatricians, to pass information when it is relevant and needed

You as the parent can come to the center or easily get ahold of your child's BCBA throughout the day
